All the recent posts discussing the building of rigs for 160 plus the talk about getting on the band have finally got to me....

While at our local surplus haunt, I spied the following tubes that I can't find info for in my stuff:

4B31
4C35
845W

Ratings and typical service would be nice. Am thinking not only of a simple 160 rig, but maybe something I can use with my R-390A on the WARC bands CW. Thoughts?

Thanks,

Dennis
KG6ZI
